EDUCATION

The University of Hong Kong

2022 – now

Mechanical Engineering

LANGUAGE

Chinese (Cantonese & Mandarin) - Proficient

English - Proficient

German - Basic

WORK EXPERIENCES

The Hong Kong Productivity Council

Winter Intern in Smart Manufacturing Division

Hong Kong

Dec 2025 - now

- Researched global textile recycling regulations and standards and developed an ESG toolkit to drive circular innovation and long-term sustainability for Hong Kong fashion enterprises.

Faculty of Engineering, University of Hong Kong

Part-time Temporary Student Research Assistant

Hong Kong

Sept 2025 - now

- Mentored students in robotic arm control and design, enhancing their practical skills and understanding of engineering concepts.
- Provide constructive feedback to lecturers on behalf of workshop content and delivery which assisted them in workshop development.

Feelings Group Limited | HKSTP

Student Technician – Hardware team

Hong Kong

Dec 2024 – Jan 2025

- Conducted literature study and market research for Radar hardware systems medical device development for tracking vital signs of small animals.
- Gained experience in camera development using electronic modules, such as Raspberry Pi, LAN network and camera module.
- Utilized engineering design (SolidWorks) to create models for improving company's office appearance and professionalism.

The Hong Kong and China Gas Company Limited (Towngas)

Summer intern in residential product & development department

Hong Kong

Jul - Aug 2024

- Contributed to the development of IoT gas appliances. Identified potential problems in functional tests and provided effective suggestions to enhance user-friendliness of the mobile app interface.
- Assisted in the assessment of gas appliance accessories such as flexible hose and gas malleable iron fittings.
- Analyzed market potential for company's products and participated in daily meetings, contributed to strategic planning and understanding team structure and working principles.

PROJECTS & COMPETITIONS

HKU DBF Team (AIAA) (2026)

Admin Leader (2025), Team Leader (2026)

- Research analysis and calculation for main wing; Aerodynamic analysis on airfoils and wing, and CFD analysis on entire model aircraft.
- Banner towing mechanisms using electronics, Avionics and 3D printing for prototypes.
- Aircraft Performance analysis by automating the calculation process for mission score optimization
- Team administrative including team progress monitoring, school funding proposal writing, poster design and management of new members

Cathay Pacific Career Experience Day (2025)

- A 1-hour mock hackathon in CX city which I worked with 3 other students to come up with an 800K project proposal. Oversaw product design and market research.

RAICOM Robotic Arm Challenge (2025)

- Broke down the structure of the algorithm for automated and semi-automated missions; performed data annotation for AI model training

HKU UAS Drone Team (2024)

- Hardware team member, gained experience in drone assembly and soldering

Hong Kong Techathon (2023)

- Designed an app interface for educational purposes in subjects related to Astronomy

IMechE Affiliated Member & Committee

General Secretary, Physics Society, HKU (2023)

HKIE Aircraft Division – Student Member

Royal Aeronautical Society (HK) Student Member 2025

SKILLS & INTERESTS

CAD Software:

SolidWorks (Proficient), AutoCAD (Proficient), fusion360 (Working level)

CFD Software:

Xflr5 (Proficient), Ansys (Working level)

Other Software:

Microsoft Office Suite (Intermediate)

Programming:

MATLAB (Working level), Arduino (Working level), Python (Working level), Orange data mining (Working level)
